AT THE EPI- CENTRE.

ART- ISTRY

FREED HOTEL & RESIDENCES WILL BE THE FIRST TORONTO LOCATION TO INCLUDE WORK FROM MURAKAMI, CREATING A DESTINATION FOR ART ENTHUSIASTS AND THOSE WANTING TO SEE A PIECE OF FUTURE POP CULTURE HISTORY.

PHOTO: GUILLAUME ZICCARRELLI

Born in Tokyo in 1962, Murakami graduated from Tokyo University of the Arts in 1993. In 2000, he proposed "Superflat," a concept/theory of contemporary visual culture that connects traditional Japanese art with the flatness of anime and manga while also referring to the state of Japanese society. In 2005, Little Boy, the exhibition he curated at the Japan Society, New York, was awarded the Best Thematic Show by AICA-USA.

His recent solo exhibitions include Stepping on the Tail of a Rainbow, The Broad, Los Angeles (2022); Perrotin Dubai (2022); MurakamiZombie, Busan Museum of Art, Busan (2023); Unfamiliar People - Swelling of Monsterized Human Ego, Asian Art Museum, San Francisco (2023-24); Still Lives with Flowers, Perrotin, Shanghai (2023) and Mononoke Kyoto, Kyoto City KYOCERA Museum, Kyoto (2024).

FROM THE ARTIST

"...it's a sculpture decorated with 'flower' motifs where a family could communicate with one another to find out how these motifs relate to each other. In short, when I created this sculpture, I had to write a scenario to imagine if those 'communication' between a parent and a child would work out or not when going 360 degrees around this sculpture."

TAKASHI MURAKAMI

Artist

"Art is a central focus for me with every new condominium project. I fell in love with the way a piece can define a streetscape or give a new layer of intrigue to an outdoor space. The chase of finding the perfect artist and the perfect installation is a hobby that I will never get bored of."

THE TEAM

A | S ADRIAN SMITH + GORDON GILL
C | G ARCHITECTURE

Adrian Smith + Gordon Gill Architecture is dedicated to the design of high-performance, sustainable architecture on an international scale. The firm approaches each project with an understanding that architecture has the power to influence to aid society, advance modern technology, sustain the environment and inspire those around us to improve our world. We use an integrated design approach that emphasizes a relationship with the natural environment -- a philosophy called global environmental contextualism. This approach takes into consideration building orientation, daylighting, generation of wind power, solar absorption, and a site's geothermal properties and represents a fundamental change in the design process, one in which form follows performance. It's based on the understanding that everything within the built and natural environment is connected, and that a building's design should stem from an understanding of its role within that context -- locally, regionally and globally.
